## SUMMARY

Data Analyst skilled in SQL, Python, Excel, Power BI and with strong abilities in data cleaning, analysis, dashboards and KPI tracking. Experienced in generating insights, organizing datasets and supporting decision-making through clear reporting, visualization and analytical problem-solving.

## SKILLS

**Programming & Querying:** SQL, Python, MySQL, Query Optimization, ETL, Problem Solving

**Business Intelligence & Visualization:** Power BI, Excel Dashboards, Pivot Tables, KPI Tracking, Automation

**Analytics & Statistics:** Data Cleaning, EDA, Descriptive Statistics, Forecasting Basics, Insight Generation, Performance Analysis, Trend Analysis

**Other Skills:** Advanced Excel, Google Sheets, Documentation, Business Analysis,, Analytical Reasoning

## EXPERIENCE

### Data Analytics Training

Pyspiders Institute

July 2025 – March 2026, Bengaluru, India

- Processed and consolidated **1,000,000+** rows of multi-regional data using Excel and SQL, improving weekly KPI accuracy by 22% and enabling consistent cross-geography business reporting.
- Designed reusable Excel templates with VLOOKUP logic and pivot structures, reducing **reporting time by 40%** across four business departments and improving documentation quality.
- Developed Power BI dashboards visualizing revenue trends and customer mix, increasing visibility of monthly patterns and enabling managers to generate **data-driven decisions 30% faster**.
- Collaborated with four analysts and two senior managers to define six KPIs, strengthening data standardization and improving overall reporting **reliability by 18%** across business units.

## PROJECTS

### ShipX Grocery Sales – End-to-End Sales Performance Analysis – Python, SQL, Power BI

- Analyzed 8,000+ retail records using SQL to evaluate product and outlet performance
- Performed data cleaning and preprocessing using Python (Pandas) to ensure data consistency
- Identified top-performing categories and outlet tiers contributing to revenue trends
- Built interactive Power BI dashboard using DAX to track KPIs such as Total Sales, Average Sales

### Customer Behavior Analysis – Python, SQL, Power BI

- Examined customer shopping behavior to uncover purchasing patterns and spending trends.
- Cleaned and transformed data using Python (Pandas) for exploratory analysis.
- Applied SQL joins, aggregations, and filtering to generate customer insights and KPIs.
- Identified key customer segments and spending patterns.
- Developed interactive Power BI dashboards to visualize customer demographics and purchase Behavior.

### Skincare product Recommendation System

- Evaluated skincare dataset to identify trends in ingredients, product ratings, and skin-type suitability
- Performed data cleaning and EDA in Python, handling missing values and standardizing features
- Wrote complex SQL queries using joins, aggregations, and filtering to extract business insights
- Designed Power BI dashboard to visualize product trends, ratings, and ingredient insights.

---

## CERTIFICATIONS

---

### Data Analytics and Python Certificate

Pyspiders • 2026 • Completed Data Analytics involving SQL, Python, Power BI, Excel  
Infosys springboard • 2023 • Programming fundamentals using Python

---

## EDUCATION
